

Example Identity Customer Council (sample)

2026 board impact (sample)

Annual board impact · Customer Council · January 1, 2026 to December 31, 2026 · delivered October 9, 2026

Summary

This is a sample, with fictional data, of the annual board-impact summary Candid Table delivers.

In 2026, eleven security and identity leaders met five times, including a two-day flagship in Chicago. They pushed hardest on workforce passkeys, audit-ready access reviews and identities for AI agents. Example Identity shipped seven of the themes the board ranked highest, has four more planned, and told the board plainly why two are not on the roadmap.

Nine of the ten members seated in January are still on the board, and two new members joined.
